

INDEX, VOLUME 94

A

- ABDULLAH, ABDUL JABBAR:
The "musical" sound emitted by a tornado. 213.
- ANDERSON, CALVIN E:
and Frederick G. Finger and Harold M. Woolf. Synoptic analyses of the 5-, 2-, and 0.4-millibar surfaces for the IQSY period. 651.
- ANDREWS, JAMES F:
The weather and circulation of April 1966—A month with contrasting temperature regimes. 481.
The weather and circulation of August 1966—Cool and wet from the Rockies to the Appalachians. 669.
- ANGELL, J. K.:
and J. Korshover and T. H. Carpenter. Note concerning the period of the quasi-biennial oscillation. 319.
and W. A. Hass. Effect of clustering upon a 500-mb. horizontal sounding system. 151.
- Antarctica, vortex cloud photos by Nimbus I high resolution infrared. 459.
- Atmospheric circulation, kinetic energy generation and dissipation. 67.
- Atmospheric motions from sodium cloud drifts. 199.

B

- BARNES, JAMES C:
A double cloud vortex near Antarctica as seen by Nimbus I high resolution infrared. 459.
- Barotropic forecast model:
difference system and boundary conditions. 329.
in Tropics. 337.
- BARR, SUMNER:
and Miles B. Lawrence and Frederick Sanders. TIROS vortices and large-scale vertical motion. 675.
- BITER, CLEON J.:
Comments on "Picture of the month". 326.
- BLAKE, J. R.:
The Fairbanks halo of April 27, 1966. 599.
- BONNER, WILLIAM D.:
Case study of thunderstorm activity in relation to the low-level jet. 167.
- BRADFORD, R. E.:
and C. L. Bristor and W. M. Callicott. Operational processing of satellite cloud pictures by computer. 515.
- BRIER, GLENN W.:
Comments on "Gravitational tidal forces and atmospheric processes." 311.
- BRISTOR, C. L.:
and W. M. Callicott and R. E. Bradford. Operational processing of satellite cloud pictures by computer. 515.
- BROWN, RODGER A.:
Occurrence of supernumerary fogbows at subfreezing temperatures. 47.
- BRYAN, KIRK:
A scheme for numerical integration of the equations of motion on an irregular grid free of nonlinear instability. 39.
- BRYSON, REID A.:
and Walter I. Christensen. An investigation of the potential of component analysis for weather classification. 697.

C

- CALLICOTT, W. M.:
and C. L. Bristor and R. E. Bradford. Operational processing of satellite cloud pictures by computer. 515.
- CARLSTEAD, EDWARD M.:
and Saul Price. Observation of a curious electrical phenomenon in Hawaii. 272.
- CARPENTER, T. H.:
and J. K. Angell and J. Korshover. Note concerning the period of the quasi-biennial oscillation. 319.
- CARSON, ROBE B.:
Comments on "Picture of the month." 140. [Reply. 198]
- CHASE, PETER P.:
and Banner I. Miller. Prediction of hurricane motion by statistical methods. 399.
- CHRISTENSEN, WALTER I, JR.:
and Reid A. Bryson. An investigation of the potential of component analysis for weather classification. 697.
- CLARK, JAMES R.:
and Roland E. Nagle and Manfred M. Holl. Tests of the diagnostic-cycle routine in the interpretation of layer-cloud evolutions. 55.
- Clear air turbulence frequency as function of wind shear and deformation. 581.
- Cold front structure:
comments on. 324.
reply to comments. 325
- Component analysis, for classifying weather types. 697.
- CONOVER, JOHN H.:
and Ronald J. Ondrejka. Note on the stereo interpretation of Nimbus II APT photography. 611.
- Correction notices. 40, 528, 586.
- COWLEY, ANN D.:
and B. Haurwitz. Lunar air tide in the Caribbean and its monthly variation. 303.
- CRAMER, OWEN P.:
and Robert E. Lynott. Detailed analysis of the 1962 Columbus Day windstorm in Oregon and Washington. 105.
- Cyclone developments, satellite photos of. 41.
- Cyclones, tropical:
in satellite pictures. 231
upper-level structure of formative... 9.

D

- DAVIS, D. R.:
and C. E. Dean. Low-level tropospheric ozone. 179.
- DEAN, C. E.:
and D. R. Davis. Low-level tropospheric ozone. 179.
- Degree days above any base, equations developed. 461.
- DICKSON, ROBERT R.:
The weather and circulation of October 1965—Long-wave progression and temperature reversal. 49.
The weather and circulation of December 1965—Including a discussion of the record dry year in the Northeast. 192.
- Diurnal tide theory. 295.
- DRAGERT, H.:
and T. L. Richards and D. R. McIntyre. Influence of atmospheric stability and over-water fetch on winds over the lower Great Lakes. 448.

DRAKE, MARGARET:

An observational study of kinetic energy conversions in the atmosphere. 221.

and A. Wiin-Nielsen. The contribution of divergent wind components to the energy exchange between the baroclinic and barotropic components. 1.

Drought:

northeast U.S., 1962-65, possible causes. 543.

Season 1965. 192.

U.S., June 1966. 587.

E

Electrical phenomenon, Hawaii. 272.

ENDLICH, R. M.:

and R. L. Mancuso. Clear air turbulence frequency as a function of wind shear and deformation. 581.

Energy balance, kinetic, in atmosphere. 627.

Energy conversions, kinetic, observational study. 221.

Energy exchange, contribution of divergent wind components. 1.

Energy, kinetic, generation and dissipation. 67.

Eppley radiation sensors, laboratory and field tests. 259.

EPSTEIN, EDWARD S.:

Point and area precipitation probabilities. 595.

Quality control for probability forecasts. 487.

Equations, barotropic, integrated by Lax-Wendroff method. 141.

Equations of motion, numerical integration, irregular grid. 39.

ERICKSON, C. E.:

and L. F. Hubert. Reply [to comments on "Picture of the month"]. 198.

F**FAY, RICHARD:**

and Robert E. Lautzenheiser. Heavy rainfall at Island Falls, Maine, August 28, 1959. 711.

FERNÁNDEZ-PARTAGÁS, JOSÉ J.:

The "unrecorded" hurricane of October 1945. 475.

FETT, ROBERT W.:

Life cycle of tropical cyclone Judy as revealed by ESSA II and Nimbus II. 605.

Upper-level structure of the formative tropical cyclone. 9.

FINGER, FREDERICK G.:

and Harold M. Woolf and Calvin E. Anderson. Synoptic analyses of the 5-, 2-, and 0.4-millibar surfaces for the IQSY period. 651.

and Miles F. Harris and Sidney Teweles. Frictional and thermal influences in the solar semidiurnal tide. 427.

FLANDERS, ALLEN F.:

and Charles R. Holliday. Redefinition of hurricane Dora over the Gulf Stream. 616.

FLEMING, H. E.:

and D. Q. Wark. Indirect measurement of atmospheric temperature profiles from satellites: I. Introduction. 351.

FLOWERS, EDWIN C.:

and Norbert F. Helfert. Laboratory and field investigations of Eppley radiation sensors. 259.

Fogbows, supernumerary at subfreezing temperatures. 47.

FRITZ, S.:

and L. F. Hubert and A. Timchalk. Some inferences from satellite pictures of tropical disturbances. 231.

FUJITA, TETSUYA:

Accurate calibration of Doppler winds for their use in the computation of mesoscale wind fields. 19.

G**GOERKE, V. H.:**

and M. W. Woodward. Infrasonic observation of a severe weather system. 395.

GORÉE, PAUL A.:

and Russell J. Younkin. Synoptic climatology of heavy snowfall over the central and eastern United States. 663.

GRAY, T. I., Jr.:

and L. F. Whitney and A. Timchalk. On locating jet streams from TIROS photographs. 127.

Great Lakes:

effect on snowstorm, eastern Lake Ontario. 495.

lower, winds affected by atmospheric stability and over-water fetch. 448.

GREEN, RAYMOND A.:
